X-Guard® 50x30 panels

X-Guard is a complete range of machine guard that complies with the Machinery Directives, 2006/42/EC, new demands on permanent guards from 29 December, 2009. With its wide range of standard components and accessories, X-Guard is guaranteed to cover all possible machine guard applications. X-Guard was launched in 2008, since then new panel sizes have been added. We listen to our customers to enable us to develop the range as new needs arise.

The panels are available in four different heights 750, 1300, 1900 and 2200 mm. The 750 mm panel is only used for extension to the other heights. They are available in thirteen different widths, except the 1300 mm height that is in fourteen widths. The standard colour is RAL 9011 but the panels can also be tailored to specific customer requirements.

50x30 panels

- 2006/42/EC
 - 750, 1300, 1900 and 2200 mm
 - RAL 9011
