Axelent bike racks

Bike racks that saves you both space and money

Discover our wide range of bike racks that meet your needs!

Axellent Safe-X offers a wide range of bike racks – from simple to more advanced. Bike racks are available with space for 2 to 16 bikes and are adapted for both indoor and outdoor use. The space determines the choice of bike rack and with our help we make sure that your bike storage is maximised.

Take the opportunity to buy bike racks from us at the same time as your storage. Our installers can also install bike racks at the same time as storage. This way you get delivery and installation combined from the same supplier.

With focus on the environment

Today there is a lot of focus on on the environment, and with that in mind the bike is the best way of transportation. That's why we sell bike racks at Axellent so that we can contribute to a better future for the environment.

Two-tier bike racks

SAFE-X BIKE RACK, DOUBLE RACK WITH EXTENDABLE RAIL

Safe-X bike rack, double rack with two-tier extendable rail which doubles the capacity compared to traditional solutions. Our bike racks optimise your space. The double rack is available in different sizes with 4 to 16 spaces, with the option to lock the bike to the frame on both tiers.

The bike rack has an extendable rail on the top tier that can be pulled out as a ramp. The bike is then easily lifted into place using the power of a gas spring at the front of the rail. This means the bike does not need to be lifted up by hand, but can easily and smoothly be placed on the second level using the rail.

The different models and functions of bike racks are presented on the next spread.

Product list

NEW

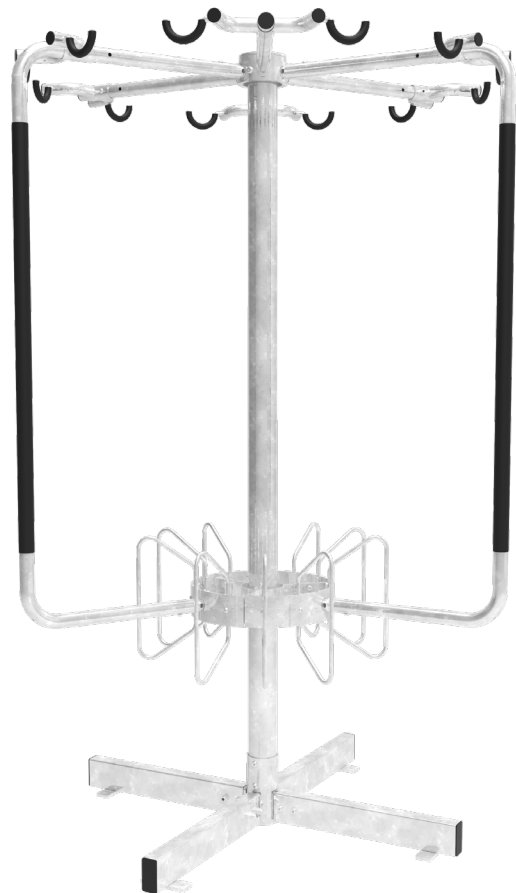

BIKE-UP SPIN 12 BIKE RACK

New!

Rotating bike rack

Axellent Safe-X presents a brand new type of bike rack. Hang up your bike and spin it round! Perfect when you are running out of space and may not have the ceiling height recommended for a two-tier bike rack. This bike rack is ideal for corner spaces. It holds up to 12 bikes. The rack is attached to the floor with 8 bolts and needs just under 3x3 meters in floor space and just over 2 meters in ceiling height to fit.

- » Holds up to 12 bikes
- » Does not take up much room
- » 3x3 m floor space
- » Ceiling height of just over 2 metres
